Registration

SilverBall is shareware. The demo level set is free, the rest of the game is not. If you liked playing the game, please consider giving us support by registering the game.

What will I get if I register?

1. Unlock additional 72 levels!
2. Being able to download new levels from the Noumena Website!
3. And helping us to continue our work to create more exciting games for your favourite handset!

You can find out how to purchase the game from the following websites:

www.my-symbian.info

www.handango.com

www.mobile2day.com

www.softwaremarket.nokia.com

Game play:

Game play in SilverBall is fairly straightforward. All the menus should be self explanatory. Your goal in the game is to control your paddle and hit as many 'bricks' as you can without losing the ball. Along the way, you will hit random bricks that has hidden 'power-up' or 'power-down' items, these special items will give you

special abilities such as allowing your paddles to fire laser beams at the bricks, or disastrous effect such as making your paddle smaller

Once all the bricks has been cleared, you proceed to the next level. The game is won if all bricks are cleared from a level set. Sounds simple? Pick a level and have a try!

How to Contact us
